Sherry Kozel, Financial Secretary

Dear Parent,

As per state law, school districts in the State of Texas are granted immunity from liability for accidents occurring on school property. Although Katy ISD is not financially responsible for medical expenses, the district has purchased a blanket accident insurance policy which covers student athletes in UIL sanctioned activities. This insurance is secondary coverage which is used in conjunction with your family insurance. If you do not have personal medical insurance for the student, the district purchased policy will become the primary coverage.

The policy purchased by the district has some **coverage limits and a \$250 deductible**. For this reason, we are encouraging all student athletes to consider buying additional voluntary student coverage. For families with no insurance or high deductibles, the voluntary insurance policy offers additional coverage for as little as \$30 per school year. The voluntary coverage would pay the \$250 deductible as well as increasing the coverage limits of the plan purchased by the district.

If you are interested in more information on the voluntary student accident insurance, you may go to www.gmsouthwest.com to see policy pricing and benefits. You can also enroll for the insurance plan online. If you would like a policy brochure, one can be obtained from your son or daughter's campus athletic department.

Charlie Stevens
Sports Medicine Director
